

New Flat Rate for LEED® Certification Services

Over the course of 2009, we participated in over a dozen LEED projects. In our experience, the work load for LEED Certification does not vary significantly regardless of size, location, or what level of LEED the project seeks. This is why we can offer a flat rate price for all projects that are targeting LEED. **Our flat rate cost is \$15,000 for any size commercial building.**

Services include:

- **Initial Design Meeting** with project team to discuss LEED options
- **Registration of the Project** with the Green Building Certification Institute
- **Technical Support for All Team Members** throughout the duration of the project
- **Facilitation and Collection of Documentation** required for the final LEED application
- **Completion of All LEED Online Templates**

These are all the services you need, aside from specific engineering services (i.e. energy modeling and commissioning), to be in a position to reach LEED Certification with ease.

We are happy to cooperate with you to reduce your costs and reduce your time. If you think you might use a hand then let us know. We'd love to see your project(s) get LEED Certified.

Sincerely,

A handwritten signature in black ink, appearing to be "VB", written in a cursive style.
